BOSKOS BROWSER

A complementary feed for exotic browsers

BOSKOS BROWSER has a high fiber content from natural sources of fiber, like Acacia. The composition comes close to the natural diet of African browsers, the digestive tract is therefore stimulated in a natural way. The vitamin and mineral content is adjusted to the needs of herbivores in Europe, with a high Vitamin D content. Linseed oil is added as a natural source of omega 3 fatty acids.

Feeding Guide

BOSKOS BROWSER is designed to be fed as a base diet depending upon needs. Should be fed as 40% of the total dry matter intake. To guarantee the intake of effecitve long fibre, BOSKOS needs to be supplemented with roughage suitable for the particular species. Keep plenty of fresh, clean water available to animals at all times.

| Calculated Analysis | | | | | | | | |
|---------------------|---|-----|------------|-------|------|------------------|--------|-------|
